SKILLS

Data analysis & BI
SQL (SQL Server, MySQL, Oracle), Power BI (DAX), Excel, KPI, reporting

Python & visualisation
Python, Pandas, NumPy, data cleaning, exploratory analysis, Matplotlib, Seaborn

Data engineering
PySpark, Spark ML, ETL pipelines, Flask, Docker, Git

LANGUAGES

French: C1
English: B2

CERTIFICATIONS

Google Cybersecurity Professional Certificate
Coursera, 2025

INTERESTS

Sport · Reading · Data & AI watch

Abdou SALOU ABDOU

DATA ANALYST · DATA ENGINEER | POWER BI · SQL · PYTHON · SPARK

PROFILE

Final-year engineering student at ISGA Casablanca, specializing in Artificial Intelligence and Big Data, I turn data into clear information, using SQL, Python, Excel and Power BI, to support decision-making and serve users. I learn by doing, taking my projects from the initial idea to the finished solution. Autonomous, rigorous and a good team player, I am looking for a PFE internship starting January 2027.

EXPERIENCE

Network & Security Intern Feb. 2025 - May 2025

National Agency for the Information Society (ANSI), Niamey - Network, Systems & Telecom Dept.

- Analysed access needs for 4 user profiles (staff, visitors, contractors, interns) and sized the solution for 100 concurrent connections.
- Designed and deployed a pfSense captive portal in a virtual lab: separate staff and visitor networks, firewall rules, DHCP and NAT.
- Implemented session logging (MAC/IP addresses, timestamps, duration), visitor quotas and bandwidth limits.
- Validated the solution through test scenarios, then wrote the technical documentation and a production rollout plan.

PROJECTS

Sales Performance Dashboard - Sales analytics 2026

Data Analyst project | SQL Server (SSMS), Power BI, DAX, Excel

- Analysed 9,994 sales rows and 5,009 orders; built a KPI dashboard for revenue, profit, quantities and margins by region.
- Surfaced a 12.47% overall margin and a 7.92% margin in the Central region, flagged as a priority for investigation.

DataPilot - Data quality pipeline (Bronze, Silver, Gold) 2026

Data Engineer project (personal) | Python, Pandas, SQL, Flask, OCR, Docker

- Built a pipeline that turns SME sales files (Excel, CSV, PDFs, handwritten ledgers) into trusted data: data contract, approved fixes and lineage.
- Raised contract checks passed from 61% to 98% on 900 test sales and read 26 of 26 handwritten amounts; SQL tables, JSON API, 149 tests.

DiabetesPredict - Big Data pipeline for diabetes prediction 2026

Data Engineer project (Big Data), ISGA | Python, PySpark, Spark ML, Scikit-learn, Docker, Streamlit

- Built a Spark ML pipeline on 253,680 patient records: data preparation, model comparison and reproducible evaluation.
- Reached 82.9% AUC-ROC and 86.4% accuracy; shipped a Streamlit interface containerised with Docker.

EDUCATION

Engineering Degree in Computer Science Oct. 2025 - present

ISGA, Casablanca - Artificial Intelligence & Big Data

Bachelor's Degree in Telecommunications and Computer Science 2021 - 2024

ESMT, Dakar - Network Administration & Security
