SKILLS

Data analysis & BI
SQL (SQL Server, MySQL, Oracle), Power BI (DAX), Excel, KPI, reporting

Python & visualisation
Python, Pandas, NumPy, data cleaning, exploratory analysis, Matplotlib, Seaborn

Data engineering
PySpark, Spark ML, ETL pipelines, Flask, Docker, Git

LANGUAGES

French: C1
English: B2

CERTIFICATIONS

Google : Cybersecurity Professional Certificate

INTERESTS

Sport · Reading · Data & AI watch

PROFILE

Final-year engineering student in Artificial Intelligence & Big Data at ISGA Casablanca, looking for a Data Analyst end-of-studies internship starting January 2027. I turn raw data into reliable indicators and clear dashboards with SQL, Power BI, Excel and Python, to help business teams make better decisions. I enjoy linking analysis to business stakes and explaining simply what the data says.

EXPERIENCE

Network & Security Intern Feb. - May 2025
National Agency for the Information Society (ANSI), Niamey - Network, Systems & Telecom Dept.

- Analysed access needs for 4 user profiles (staff, visitors, contractors, interns) and sized the solution for 100 concurrent connections.
- Designed and deployed a pfSense captive portal in a virtual lab: separate staff and visitor networks, firewall rules, DHCP and NAT.
- Implemented session logging (MAC/IP addresses, timestamps, duration), visitor quotas and bandwidth limits.
- Validated the solution through test scenarios, then wrote the technical documentation and a production rollout plan.

PROJECTS

Sales Performance Dashboard - Sales analytics 2026
Data Analyst project | SQL Server (SSMS), Power BI, DAX, Excel

- Analysed 9,994 sales rows and 5,009 orders; built a KPI dashboard for revenue, profit, quantities and margins by region.
- Surfaced a 12.47% overall margin and a 7.92% margin in the Central region, flagged as a priority for investigation.

DataPilot - Data quality and KPI dashboards 2026
Personal project | Python, Pandas, Excel, Flask, Celery, Redis, Docker

- Built a data profiling tool for CSV, Excel and JSON files: data types, missing values, duplicates and quality score.
- Generated KPI dashboards tracked against targets, reversible cleaning steps and Excel exports; 116 automated tests.

DiabetesPredict - Big Data pipeline for diabetes prediction 2026
Engineering programme - ISGA Casablanca | Python, PySpark, Spark ML, Scikit-learn, Docker, Streamlit

- Built a Spark ML pipeline on 253,680 patient records: data preparation, model comparison and reproducible evaluation.
- Reached 82.9% AUC-ROC and 86.4% accuracy; shipped a Streamlit interface containerised with Docker.

EDUCATION

Engineering Degree in Computer Science Oct. 2025 - present
ISGA, Casablanca - Artificial Intelligence & Big Data

Bachelor's Degree in Telecommunications and Computer Science 2021 - 2024
ESMT, Dakar - Network Administration & Security
